ACM Homes communities in Imus and General Trias successfully complete the Master Trainer Program

PTC's Project RISE, in partnership with Asia Society for Social Improvement and Sustainable Transformation successfully conducted the Master Trainer Program (MTP) to six ACM Homes Communities in Imus and General Trias Cities last October 01, 2022, at the Pacific Terraces Community (PTC) South Clubhouse, Imus City.

The MTP is a component of Project RISE that comprehensively and extensively trains its participants on Disaster Preparedness and Resiliency, after which they will be certified as Master Trainers who would be training their community members as part of the Citizen Training Program (CTP).

Over 50 Homeowners Association (HOA) Officials from participating ACM Homes Communities took part in this program, where they were able to participate in the Master of Disaster (MOD) Board Game Session, which they played and enjoyed earnestly. Special thanks go to Mr. Fred Dalumpines of Aboitiz Foundation, Inc. for educating and capacitating the ACM Homes HOA Officials on Disaster Preparedness and Resiliency.
