Sto. Rosario Sea Mariners complete Project Management workshop

Sea Mariners from the Sto. Rosario National HS (SRNHS) ship completed their Project Management Workshop last November 29. The activity was led by PTC and its implementing partner ASSIST Asia.

The SRNHS officers were joined by the members of their ship as they practiced how to initiate and plan a project that is anchored in the Sustainable Development Goals (SDGs) of the United Nations. This led the team to develop a project on Mangrove Tree Planting which they dubbed "*Baka-Juan Yan! BAKAWAN Para sa Kinabukasan.*" The said project was awarded as the best project during a friendly competition between the ships. The winners received a cash prize that will be used for activities related to the ship.
